About The Film

WAR AGAINST THE WEAK is a shocking investigation of American eugenics, arguably the most dangerous pseudoscience of all time, which became the largely unknown foundation for Nazi genocide. Even before Hitler's rise to power, a powerful mix of American corporate, scientific, academic and political elite was formulating a sinister racial and ethnic purification movement that attempted to breed a Nordic master race through the elimination of those deemed physically or mentally unfit. Under the Nazis, eugenic principles were applied without restraint, and with the support of Ivy League scientists funded by the Carnegie Institution, the Rockefeller Foundation and others. Ingeniously condensed from the book by award-winning journalist Edwin Black, WAR AGAINST THE WEAK is a gripping account of bad science at its worst, and a warning bell in our impending genetic age.

Film Details

Director: Justin Strawhand

Atlanta Premiere

Country: USA

[Visit Official Website](#)

Language: English

Running Time: 93 min.

Format: Digibeta

Year: 2009

Genre: Documentary
